Christiaan Wikkerink graduated with an BFA from the AKI ArteZ Institute for Arts in 2010 and currently lives and works in Enschede. His works shows an interest in inobtrusive or invisible acts and how ideas are used, propagate, (mis)appropriated and inverted, specifically in the context of an ever increasing information flow and an art world in which commerce and convention strive with innovative statements. There is a moralistic drive to the work, which however turns out to be painfully funny.
